Design at the Dawn of new Pedagogies.

Embracing nonlinear and iterative
Learning Paths by Design

Jan Eckert, PhD | Head of the Design Unit | University of Gothenburg

Design at the Dawn of new Pedagogies

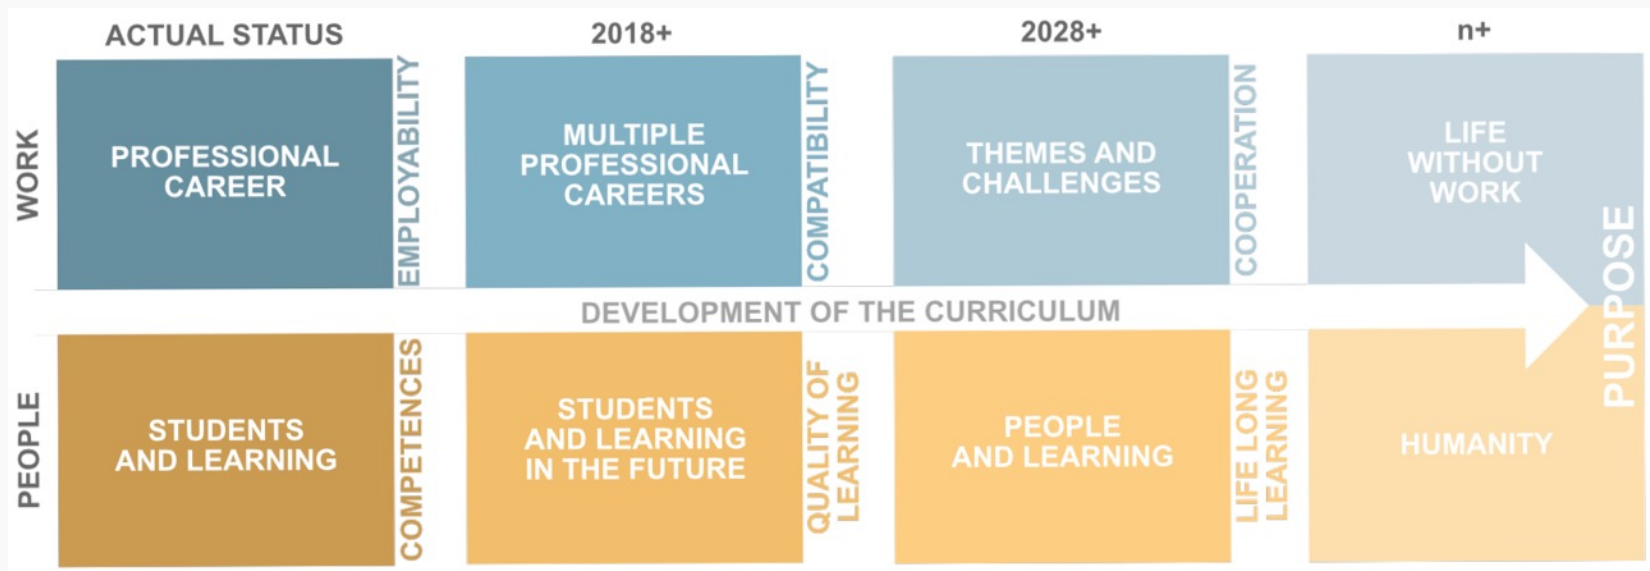

- **The «VUCA» World of Education**
- **Design won't be enough...**
- **Design at the Dawn of new Pedagogies**

Design at the Dawn of new Pedagogies

The VUCA World of Education

Volatility, Uncertainty, Complexity, Ambiguity

The VUCA World of Education

Eckert, J. (2018). *O ensino do design e o designer de acordo com o modelo Y*. EIMAD Conference 2018, Castelo Branco, Portugal

The VUCA World of Education

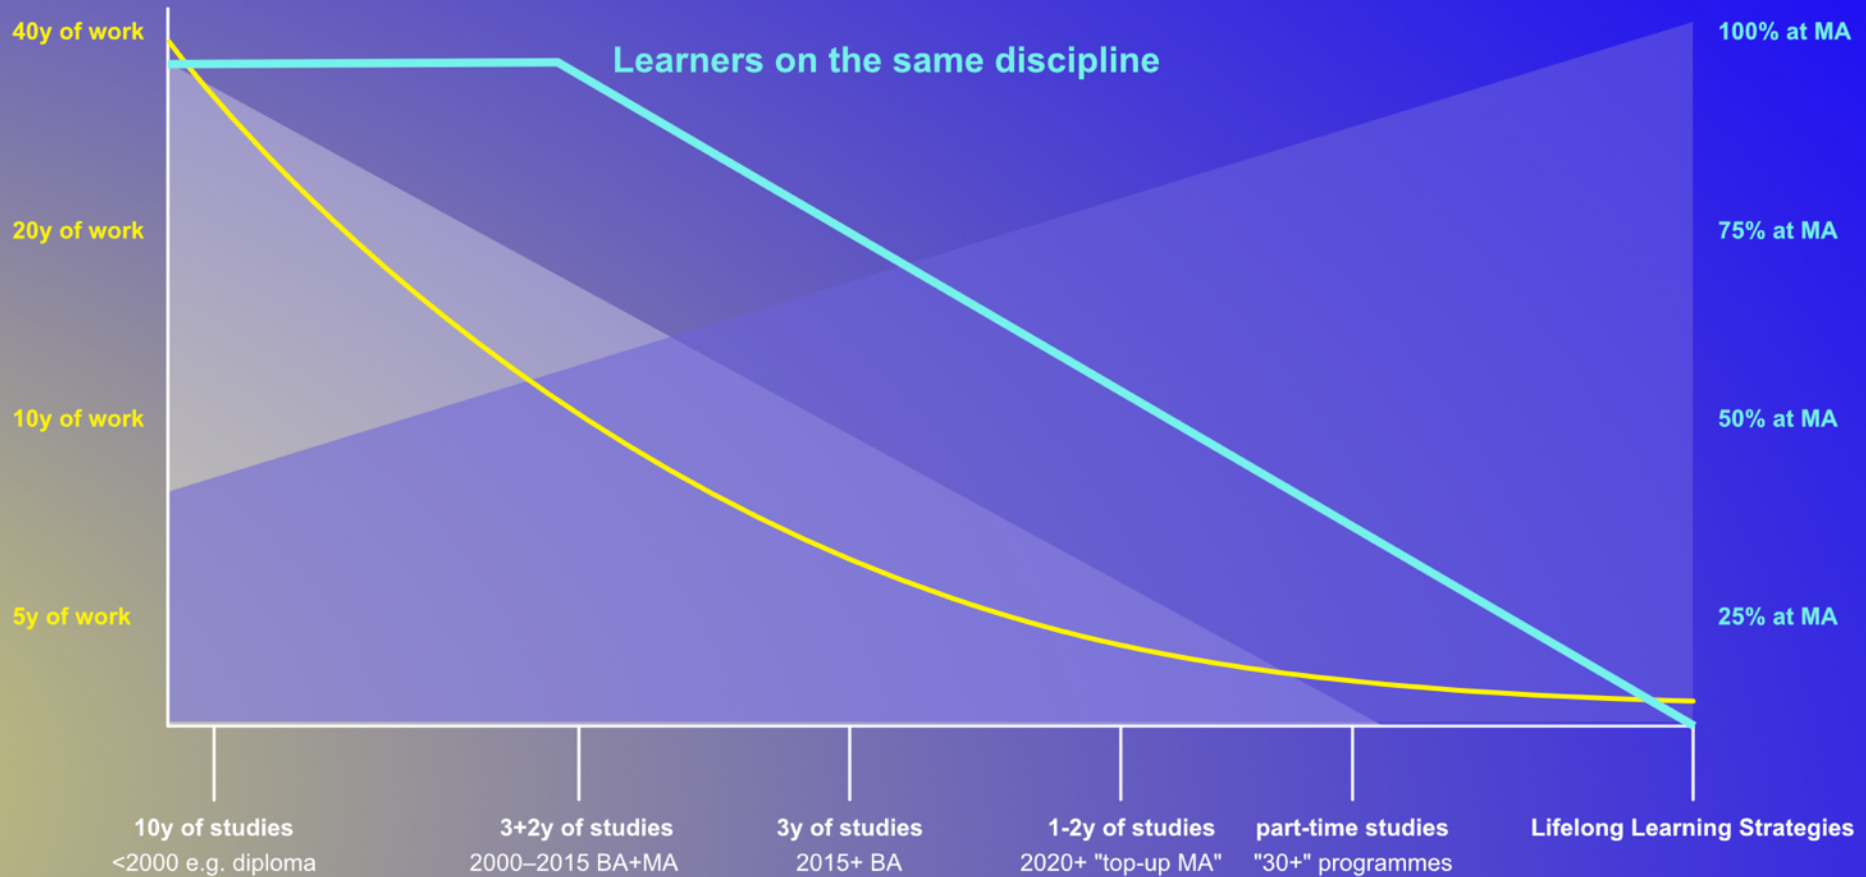

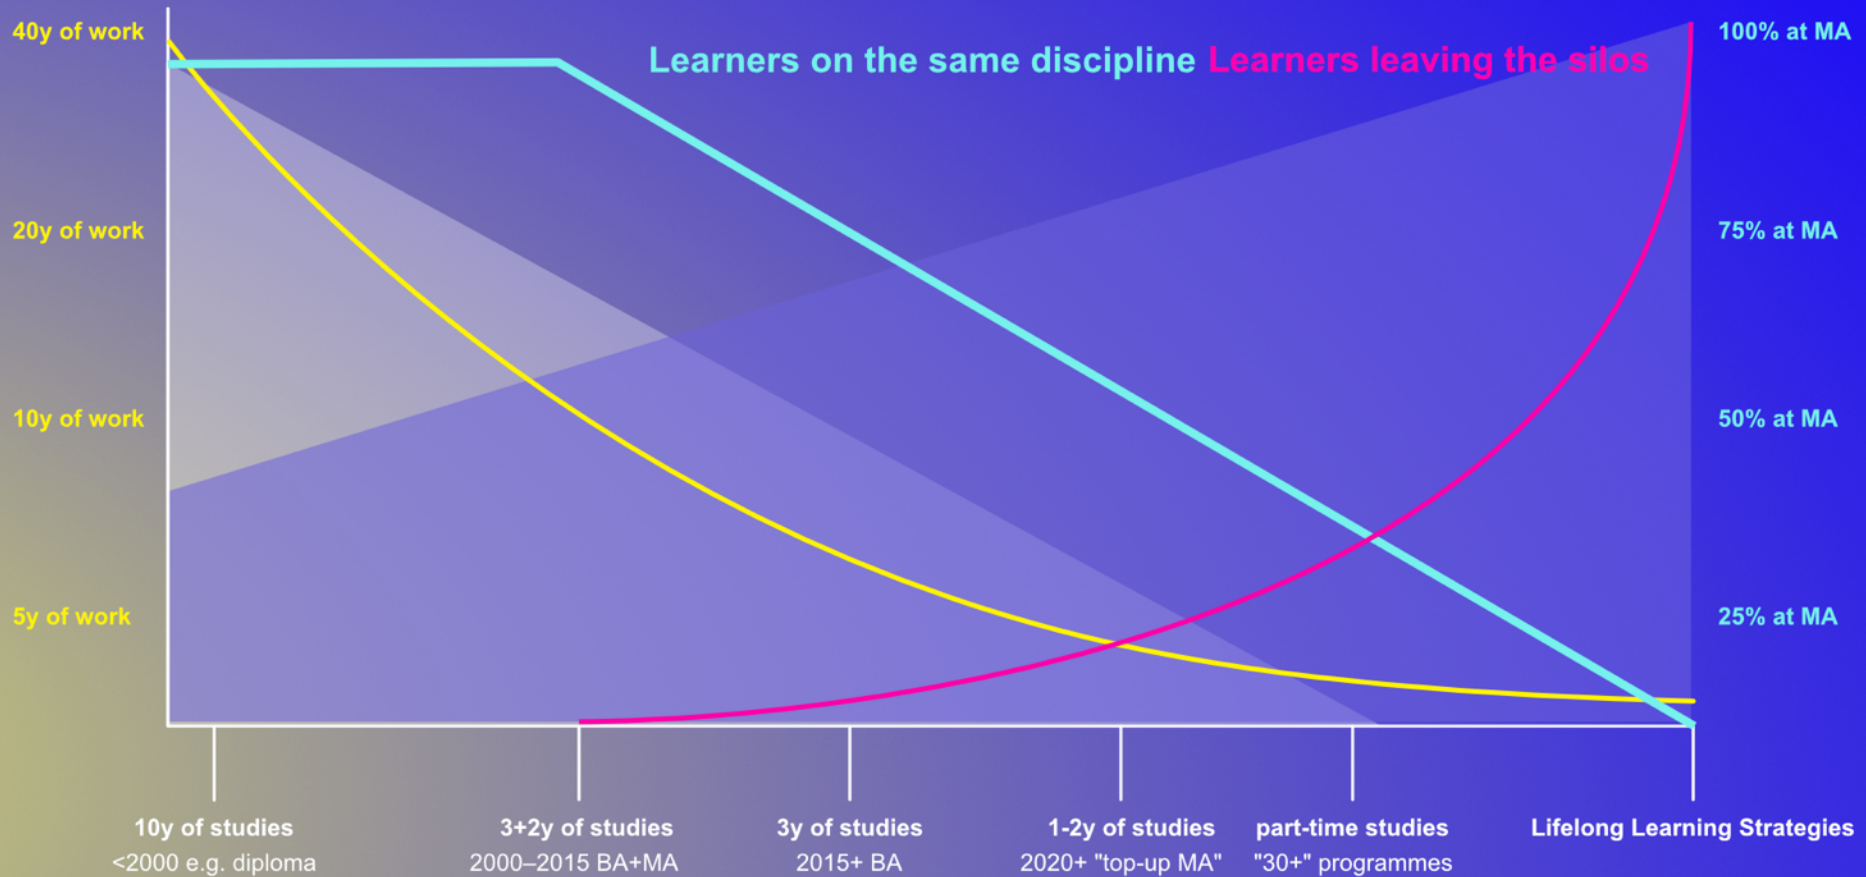

The VUCA World of Education

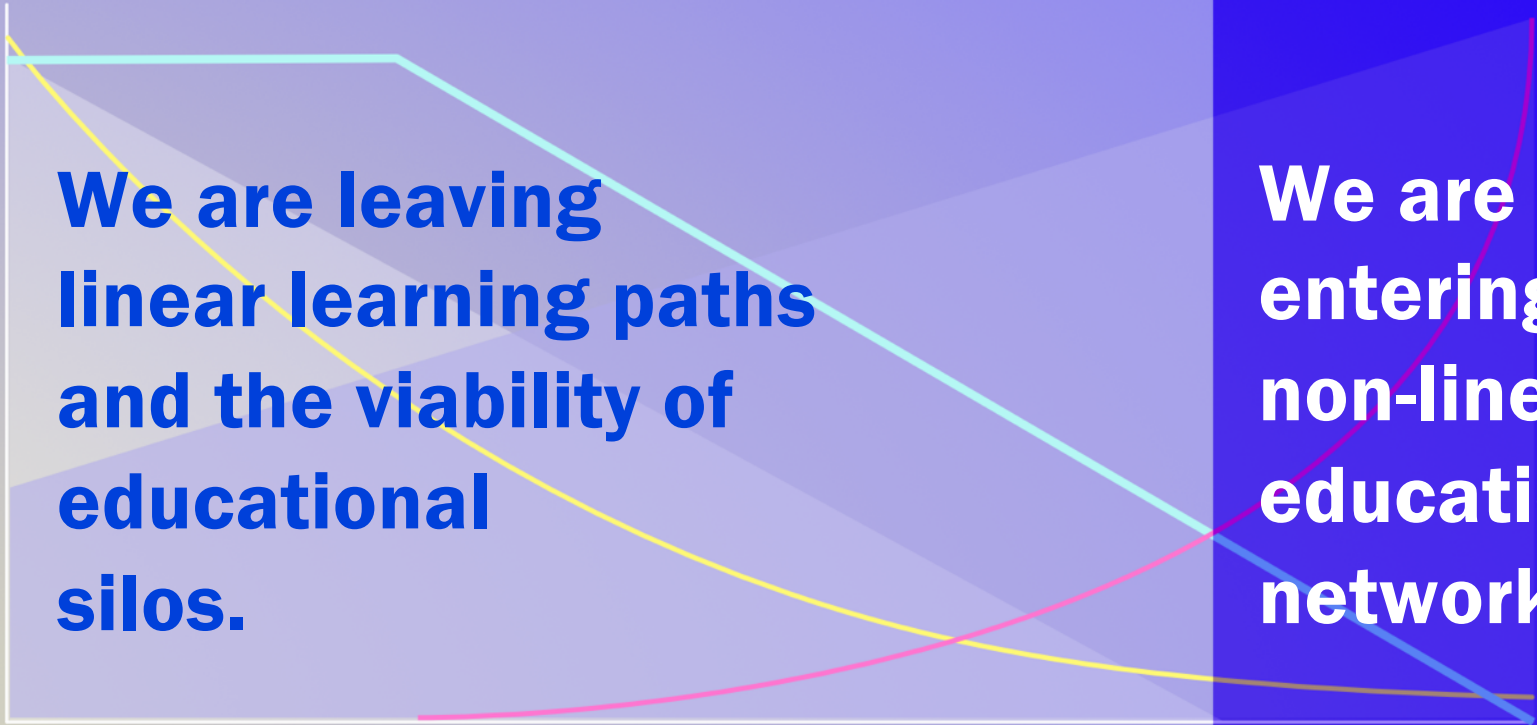

„Over the next decade, a non-negligible share of newly created jobs will be in job openings for wholly new occupations, or for existing occupations undergoing significant transformations in terms of their job content and skills requirements “

World Economic Forum. (2020). *Jobs of Tomorrow – Mapping Opportunity in the New Economy.*

**We are leaving
linear learning paths
and the viability of
educational
silos.**

**We are
entering
non-linear
educational
networks.**

Symptoms we can observe today

- “degrees” and “job titles” are being invented.
- middle-aged learners joining MA programmes while coming from other disciplines.
- Some learners, who want to specialise are struggling.
- teaching staff and institutions having a hard time to adopt.
- private offers are extending the educational landscape.

The VUCA World of Education

What have the Schools been doing, all that time?

What have the Schools been doing, all that time?

- Implementing the Bolognese system.
- Struggling to introduce new public management in higher education.
- Detaching from the non-academic world by sticking to educational silos.

The VUCA World of (Design) Education

... meanwhile

New players extend the educational landscape

Corporates launching their own educational offers

Wrap-Up: Challenges in (Design) Education

- Shift from linear to non-linear to life long learning.
- Slow process of introducing new public management versus a highspeed evolution that is needed in education.
- Institutional Silos.
- An extending educational landscape / market

Design at the Dawn of new Pedagogies

**We're at the dawn of new
pedagogies and learning
environments.**

Design at the Dawn of new Pedagogies

**Shaping this shift comes
with the same challenges
that cause the shift:**

Design at the Dawn of new Pedagogies

Shaping this shift comes
with the same challenges
that cause the shift: **Design won't be enough**

Design at the Dawn of new Pedagogies

Shaping this shift comes
with the same challenges
that cause the shift: **Design won't be enough**
**Simply because no single
discipline will be enough.**

Design at the Dawn of new Pedagogies

Design at the Dawn of new Pedagogies

Design at the Dawn of new Pedagogies

- Design is stuck in a disciplinary silo and ongoing identity crisis itself.
- (real) Multidisciplinary Collaboration still is something many designers are struggling with or are not educated for.
- Designers often fall short when engaging within hierarchical systems such as higher education.

What Design(ers) might need to learn

- Collaboration with others: abandoning the belief of authorship and the “exclusiveness” of “artistic practice and creativity”
- Transition from a school of design towards a school of managing agents and processes of design and change. (comp. Christian Guellerin)

For schools of design this might mean

- Granting more agency to learners from different backgrounds
- Curricula based on student-led and Agile Learning (Christof Arn).
- Learning beyond institutional boundaries.
- Offering minors in design to other disciplines (breaking up silos).

Design at the Dawn of new Pedagogies

What Design can contribute to the Shift 1 natural lifelong learning

Design holds the transformative power to meet the volatile, uncertain, complex and ambiguous with critical thinking and by stating hypotheses that designers are, then, able to turn into functioning prototypes of what we could call hypothetical futures.

Designers do so:

- with a human (and planet) centred approach
- by combining hard with soft facts
- by relating to evidence and creating new evidence
- **by contextualising knowledge and skills**

Design at the Dawn of new Pedagogies

Designers do so:

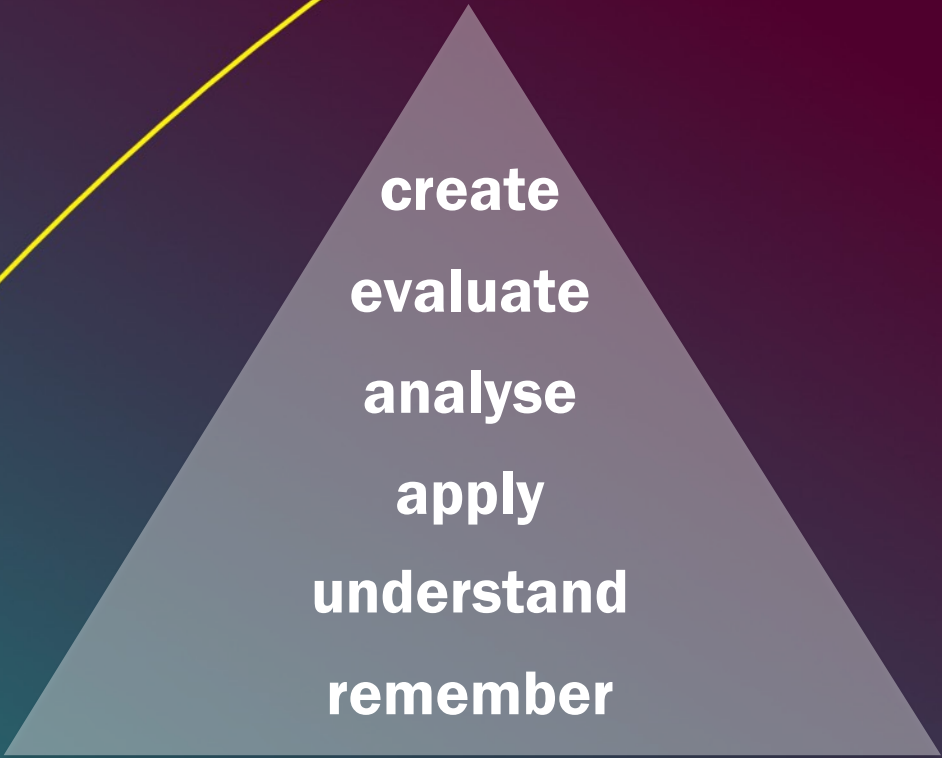

- by contextualising knowledge and skills

Designers are natural lifelong learners

Design at the Dawn of new Pedagogies

What Design can contribute to the shift 2 Pedagogies of Foresight
